

PATENT
IBM Docket No. JP920000409US1

Amendments to the Specification:

The following modifications are instructive to specific paragraphs in the Specification identified as beginning on a particular page and line and ending on a particular page and line, based upon Applicant's hardcopy of said Specification original; Applicant notes that slight variations in these values may exist based on copy of Specification under examination and requests examiner to modify based upon paragraph content moreso than page and line direction. An attachment "A" ("Version to Show Specification Markings") is affixed hereto to show changes to the clean versions below.

No Specification Amendments are Included in this Response.
